

Earle H. Shumate, Associate AIA, LEED AP

Architectural Designer

“Architecture should meet not only our functional needs, but also enliven the souls and lives of our clients and the community.”

- Earle Shumate

With 26 years of experience in design-build, Earle is well equipped to work with clients in a team-build process. Creative and innovative design solutions are a hallmark of his work. He works closely with clients to help them focus on both their programmatic needs and their aesthetic desires. His vast knowledge of the construction industry, particularly in the renovation of commercial and residential projects makes him a valuable team member in all phases of work, from schematic design and programming to contract administration.
